## National Community Reinvestment Coalition

The National Community Reinvestment Coalition is an association of more than 600 community-based organizations that promote access to basic banking services, including credit and savings, to create and sustain affordable housing, job development and vibrant communities for America's working families. Our members include community reinvestment organizations, community development corporations, local and state government agencies, faith-based institutions, community organizing and civil rights groups, minority and women-owned business associations and social service providers from across the nation. Their work serves primarily low- and moderate-income people and minorities.

NCRC staff who participated in this research include:

**John Taylor**, President and CEO

**David Berenbaum**, Executive Vice President

**Joshua Silver**, Vice President, Policy and Research

**Denitza Mantcheva**, Research Analyst

## Executive Summary

America is currently confronted with a serious foreclosure crisis, largely due to lending institutions engaging in unfair and deceptive high-cost lending. Most of the high-cost or subprime loans made in recent years feature adjustable rate mortgages (ARMs) with low “teaser” rates for the first few years, followed by rapidly rising rates. In mid-2007, warnings of a crisis were issued, as the interest rates on these loans adjusted, and both experts and pundits discussed interest rate resets and shocks.<sup>1</sup> Currently, the crisis is much wider and much deeper than increasing interest rates alone. Significant numbers of borrowers with ARM loans are defaulting, even before the first interest rate adjustment on their loans, suggesting that unsatisfactory underwriting practices have left them with loans that are unaffordable. Moreover, many borrowers stuck in such loans have not been able to refinance due to drops in home values, leaving them with loan amounts greater than the values of their homes.

Against the backdrop of the risky, high-cost lending practices, NCRC has observed striking racial disparities. If a consumer is a minority, particularly an African-American or Hispanic, they are most at risk of receiving a poorly underwritten high-cost loan. Middle-class or upper-class status does not shield minorities from receiving high-cost loans. NCRC observed that racial differences in lending increase as income levels increase, making middle- and upper-income (MUI) minorities more likely to receive high-cost loans than low- and moderate-income (LMI) minorities are, when compared to LMI and MUI whites.

MUI African-Americans were twice or more likely as MUI whites to receive high-cost loans in 71.4 percent of the metro areas examined in this report, while LMI African-Americans were twice or more likely as LMI whites to receive high-cost loans in just 47.3 percent of the metro areas during 2006.<sup>2</sup> The graphs accompanying this report also display the phenomena of lending disparities climbing with income levels when comparing Hispanics to whites and minority to non-minority census tracts.

High-cost loans compensate lenders for the added risk of lending to borrowers with credit imperfections. However, wide differences in lending by race, even when accounting for income levels, suggests that more minorities are receiving high-cost loans than is justified based on creditworthiness. As discussed below, previous studies by NCRC and others suggest that after controlling for creditworthiness and other housing market factors, minorities are receiving a disproportionately large amount of high-cost loans. When minorities receive a disproportionate amount of high-cost loans, they lose substantial amounts of equity through higher payments to their lenders. They are more exposed to irresponsibly underwritten ARM loans that are likely to result in default and foreclosure.

---

<sup>1</sup> Renae Merle, *Despite Interest Rate Cuts, Foreclosures Hit Record High*, The Washington Post, June 6, 2008.

<sup>2</sup> The year 2006 is the most recent year for which Home Mortgage Disclosure Act (HMDA) data is publicly available as of the release of this report. NCRC observed lending patterns in metropolitan statistical areas (MSAs) or metropolitan divisions (MD), using the boundaries provided in Home Mortgage Disclosure Act (HMDA) data issued by the Federal Financial Institutions Examination Council (FFIEC). Metro areas in this report refer to MSAs and MDs.

**Metro Areas Where African-Americans are Twice or More Likely to Receive High-Cost Loans Than Whites**

**Metro Areas Where Hispanics are Twice or More Likely to Receive High-Cost Loans Than Whites**

**Metro Areas Where Borrowers in Minority Tracts are  
Twice or More Likely to Get High-Cost Loans Than  
Borrowers in Non-Minority Tracts**

In 2007, NCRC produced its first *Income is No Shield Against Racial Differences in Lending* report. Similar results to those presented in this report were observed, including that LMI African-Americans were twice or more likely to receive high-cost loans as LMI whites in 35.9 percent of the metro areas analyzed. Furthermore, MUI African-Americans were twice or more likely than MUI whites to receive high-cost loans in 74.2 percent of the metro areas during 2005.<sup>3</sup> According to this study, the most significant racial disparities occurred in the following metro areas (presented in descending order, with the most significant at the top):

**Twenty Metro Areas with the Most Significant Racial Disparities**

1. Milwaukee-Waukesha-West Allis, WI
2. Minneapolis-St. Paul-Bloomington, MN
3. Huntsville, AL
4. Ann Arbor, MI
5. Hartford-West Hartford-East Hartford, CT
6. Bridgeport-Stamford-Norwalk, CT
7. Greenville, NC
8. Philadelphia, PA
9. Essex County, MA
10. Durham, NC
11. Raleigh-Cary, NC
12. Dayton, OH

15. Cleveland-Elyria-Mentor, OH
16. Roanoke, VA
17. Rochester, NY
18. Harrisburg-Carlisle, PA
19. Lubbock, TX
20. Warren-Troy-Farmington Hills, MI

This report also examined the racial and ethnic disparities in rural areas. Additional lending disparities, when considering both LMI and MUI, were found in rural areas in the states of South Carolina, North Carolina and Maryland when comparing African-Americans to whites. Rural areas in the states of Colorado and Connecticut also exhibited large lending disparities when comparing Hispanics to whites.

Due to the presence of racial disparities over the past several years, NCRC calls upon multiple parties to enact bold programmatic and policy reforms to narrow racial disparities in lending and ensure a fair marketplace. Community groups and financial institutions should engage in more partnerships to devise counseling programs and lending products that are fairly priced and affordable for low- and moderate-working class Americans.

Congress should pass a comprehensive anti-predatory law that prohibits steering or price discrimination and that outlaws a range of equity-stripping and unfair practices. The Homeownership Preservation and Protection Act of 2007 (S. 2452) represents an excellent start for an anti-predatory lending bill. NCRC also recommends that Congress pass the Community Reinvestment Modernization Act of 2007 (H.R. 1289), that would encourage more prime or market rate lending to minorities. In addition, federal and state regulatory agencies need to significantly bolster the rigor of their predatory lending and fair lending enforcement.
